

GGFX LICENSE AGREEMENT

& Copyright Notice (GGFX Starter, GGFX MC Ultimate, PSD Thumbnails, and other GGFX products)

By purchasing, downloading, or otherwise gaining access to any GGFX product ("Pack"), you agree to the following terms:

1. Ownership & Copyright

All content included in the Pack — graphics, textures, overlays, backgrounds, gradients, icons, PSD files, modpacks, skin poses, and any other files — is the exclusive intellectual property of GGFX (created by gulsa), protected by copyright from the moment of creation. Purchasing the Pack does not transfer ownership of the content to you; it only grants you a license to use it as described in Section 2.

2. Permitted Use

You are granted a non-exclusive, non-transferable, personal license to use the Pack's content without restriction — including for your own projects and for graphic work you create for others (e.g. as a freelancer/designer) — including commercial use.

3. Strictly Prohibited:

- Reselling, giving away, sharing, renting, leaking, or otherwise distributing the Pack or any part of it (including individual files), whether publicly or privately.
- Uploading the Pack to any public or private storage, other Discord servers, cloud drives, marketplaces, GitHub, torrents, etc.
- Sharing the downloaded files or purchase/access credentials with anyone who has not purchased the Pack.
- Presenting any part of the Pack's content as your own original work and reselling or offering it as your own product.

4. Violation & Enforcement

Any sharing, leaking, or unauthorized distribution of the Pack constitutes a copyright violation. GGFX reserves the right to:

- Immediately revoke the violator's access with no refund,
- Report the violation on any platform where it occurs (Discord, YouTube, cloud storage, etc.) via a DMCA/copyright takedown request,

- Pursue further legal action against the person who shared the Pack, as well as against anyone who obtained and uses the leaked Pack without purchasing it.

If you discover someone sharing or reselling GGFX content without authorization, please report it on our Discord: discord.gg/ggfx

5. Traceability

The Pack may contain hidden identifying markers (watermarks/metadata) that allow a leaked copy to be traced back to the original buyer.

6. Warranty

The Pack is provided "as is." GGFX is not responsible for any damages resulting from use of the Pack, nor for compatibility with every software version.

7. Contact
